

Premium Waste, Recycling & Environment Solutions

Customizable management plans and top quality service delivery means your priorities are met at every visit.

Here's how:

- Integrated solutions makes us your one-stop service provider
- Our commitment to innovation ensures you receive the most cost effective services in the industry
- Over 25 years' experience delivering premier customer care

Waste Management & Recycling Services

Acden Environment is the largest provider of waste management, recycling and landfill services in the Regional Municipality of Wood Buffalo with 25 years of experience and recently has branched out to Edmonton. With a fleet of over 115 light and heavy duty vehicles, bins to suit all traditional waste streams and over 25 years of experience servicing Northern Alberta's Oil Sands, we provide exceptional, high quality service, customized to meet your needs. We are proud to provide the following services:

Industrial and Commercial Waste Collection Services

Acden has vast experience providing collection services to remote areas and those with restrictive access requirements. We can accommodate any bin configuration to suit all traditional waste streams and have the ability to design and manufacture specialty bins to suit your unique needs.

- Front Load Bin Services
- Roll Off Bin Services
- Lugger Bin Services

Landfill Management

Acden Environment has the proven expertise to meet and surpass all Landfill and Transfer Station requirements. We have over 15 SWANA accredited managers and operators prepared to operate and govern waste streams, mobilize equipment and perform the due diligence required to manage a world class sanitary site.

Recycling Management

Successful recycling in today's world requires a global reach. From initial collection to the sale of goods back into markets, our recycling management approach will help you minimize the impact of your business and reduce your environmental footprint.

Hazardous Waste Management

Acden Environment has been a recognized leader in supplying Oil Sands Hazardous Material Management solutions in the Regional Municipality of Wood Buffalo. Whether as the hands-on complete site solutions provider or by utilizing one of many Acden business partners, the collection, sorting, packaging and transportation to certified facilities is handled with the utmost care and caution.

Protection of our lands is top of mind when we are granted these potentially dangerous contracts. Acden has 16 people on staff that have been certified by SWANA in the care and management of Hazardous Materials in the most effective and efficient manner.

Scrap Metal Management

Utilizing valued partnerships, Acden Environment can provide the turnkey collection, sorting, handling and sale of all scrap metals. Whether ferrous or non-ferrous, we will facilitate the entire process from collection to the final sale, maximizing your return on your invested sorting efforts.

Complete Customized Environmental Management Plans

Acden Environment has the ability to integrate services with all 17 of our Acden companies, meaning we have the unique ability to offer you a fully integrated, one stop shop suite of services. Together, we provide essential services for the planning, construction, maintenance and reclamation of Northern Alberta's Oil Sands projects and SAGD facilities.

Transportation of Waste Products

We are proud to be the experts in our field for the reliable, safe transportation of waste products. With a fleet of over 115 light and heavy duty vehicles ranging from highway tractors to collection vehicles, we are fully prepared to meet your waste transportation needs and challenges.

Specialized Transportation Services Available

Put us to the test! Acden Environment has been called on many times to provide "out of the box", creative solutions to situations unique to the Oil Sands clients we have the privilege of serving. Do you have a unique challenge or problem that needs a solution? Contact us today, we can help!
