

STRATEGIC PARTNER FOR WEAR SOLUTIONS

YOUR UPTIME IS OUR MISSION

WE KEEP YOU UP AND RUNNING

The world's leading wear service network

Providing high productivity and low maintenance costs is the core business for every Hardox® Wearparts Centers. We support you with the right choice of wearparts and service, and we are determined to do it better than anyone else.

Improve your operation's efficiency and put the right steel in the right place. Our experts work to solve your most stubborn wear-related challenges. They will combine the right mix of advanced high strength steels to boost your uptime, optimize maintenance planning and increase efficiencies. Ask us for an **Upgrade Evaluation** to save time and money.

Demand the best materials available

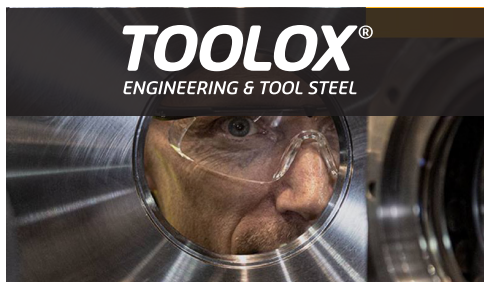

Hardox® wear plate is the world's leading abrasion-resistant (AR) steel. It's hard through and through, from the surface down to its core for extended service life and high productivity in the most challenging environments.

Strenx® performance steel is an advanced high-strength steel in the 600-1300 MPa range for making structures both strong and light.

Duroxite® overlay is a wear resistant compound material well suited to fighting sliding wear from exceptionally hard particles.

Toolox® engineering and tool steel is a pre-hardened engineering and tool steel with excellent properties at elevated temperatures.

Certified expertise

Your uptime is our mission

Hardox® Wearparts is a worldwide network of wear service centers. We provide wear parts and wear solutions that keep industries up and running with optimized productivity and service life.

CONSULTING

Our wear specialists provide advice on material choice and design of wear solutions.

SIMULATION

Use new technology for predicting wear through computer simulation while the products are still in the design stage.

OPTIMIZATION

We can optimize productivity and reduce downtime of your entire wear-affected flow.

ON SITE VISITS

By evaluating your wear situation on site we can recommend the most suitable wear solutions.

CALCULATION

Find the ultimate material choice for your specific wear circumstances with our comprehensive software, Hardox® WearCalc.

INSTALLATION

Wear parts installation and repair work on site is part of our scheduled and emergency services.
