

Producer of Kevlar® Sleeves & Personal Protective Equipment

Our Kevlar® products are fire retardant and slash resistant ensuring your team is protected in any environment.

Here's how:

- Kevlar® material is twenty times stronger than steel
- Industrial level protective wear that doesn't impede mobility or performance
- Lightweight and long-lasting personal protective equipment
- SK-10 2 ply
- ANSI Cut level 3

DuPont™ Kevlar® Sleeves

Acden is the only producer of Kevlar® industrial knitwear in Western Canada. Twenty times stronger than steel, these industrial protectors are made of 100% Kevlar® – a synthetic fiber that is fire retardant as well as slash and puncture resistant.

Wholly- owned by Acden, our manufacturing services previously operated as Chip Manufacturing. During the 1990s, the Athabasca Chipewyan First Nation and Suncor Energy Inc. developed a working relationship and together began plans to establish a manufacturing facility in the community of Fort Chipewyan, Alberta.

Today, the company provides a viable economic opportunity for the community members of Fort Chipewyan and has grown to employ 15 full-time employees.

What is Kevlar?

Dupont™, the supplier of Kevlar®, describes this brand fiber as an aramid that delivers the power of performance to workers exposed to a variety of cut, abrasion and high heat hazards. From the oil and gas industry to computer assembly and metal stamping, apparel made with Kevlar® performance technology meets the specific performance and protection requirements of a diverse group of industries. When you decide to outfit your employees in industrial protective knitwear of Kevlar®, you'll provide lightweight comfort that enables workers to perform safely and comfortably in some of the most demanding environments.

Kevlar® Sleeves

Kevlar® sleeves are lightweight and formfitting, fitting comfortably while providing slash and fire retardant protection. Sleeves come in 1 and 2 ply and are 4 inches in diameter and 9 inches in length.

100% Kevlar® facts:

- Man-made product invented by Dupont™
