

Pipeline Infrastructure Construction & Maintenance

Acden Surerus Murphy provides safe, efficient, and high-quality pipeline infrastructure solutions to support the evolving needs of the energy sector in the Regional Municipality of Wood Buffalo (RMWB) and beyond. Together, we provide the pipeline construction and maintenance services.

Here's how:

- Combining pipeline and facility expertise with regional knowledge to deliver high-quality pipeline infrastructure projects from design to execution, through to maintenance.
- Prioritizing safety in every aspect of work, fostering a strong safety culture to ensure high standards and quality in every project.
- Ensuring sustainable practices create positive, lasting impacts in the communities where we operate.

Building & Maintaining the Future of Energy Infrastructure

Acden Surerus Murphy is dedicated to delivering pipeline infrastructure projects that meet today's needs while preparing for future opportunities. Our integrated team specializes in:

- **Pipeline Construction:** Design, fabrication, and installation of pipelines for traditional and renewable energy markets.
- **Pipeline Related Facility Construction:** Building and maintaining infrastructure such as compressor stations, storage facilities, power stations, pumping stations and energy-transition facilities.
- **Pipeline Maintenance:** Proactive and ongoing process to preserve the integrity, performance, efficiency and functionality of existing pipelines and their related infrastructure, through inspection, cleaning, testing and repairing.
- **Project Management:** End-to-end management, including planning, estimating, budgeting, and scheduling for pipeline infrastructure projects.
- **Pre-Construction Services:** Detailed pre-construction estimating, project controls, and budgeting to ensure efficient project execution.
- **Safety and Compliance:** Ensuring the highest safety standards, compliance with regulations, and risk management throughout the project lifecycle.
- **Innovation and Technology Integration:** Use of advanced technologies and techniques to drive efficiencies, improve safety, and provide real-time data for decision-making.

Acden Surerus Murphy drives innovation and impact, enhances local opportunities, and delivers the infrastructure that powers the future of the RMWB and beyond.
